

A close-up photograph of a bumblebee on a yellow flower. The bee is positioned in the lower half of the frame, facing upwards. Its body is covered in dark, fuzzy hair, with a distinct yellow patch on its abdomen. The bee's head is tilted back, and its antennae are visible. The background is a bright, out-of-focus yellow, likely the petals of the flower. The lighting is natural, highlighting the textures of the bee's fur and the flower's petals.
